

BBX Sidepanel Kit Assembly Manual

by Larry vs Harry

Step 1

Things you need to attach the BBX Sidepanel Kit

Tools required

In the box

Wrench/Spanner

10

mm

Allan/Hex key

4

mm

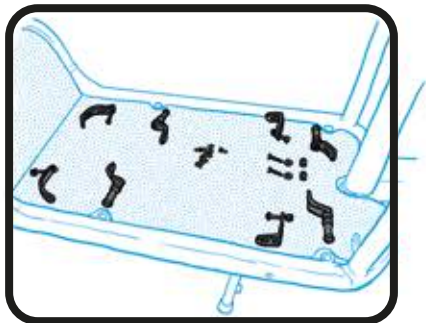

Grease
(metal on metal)

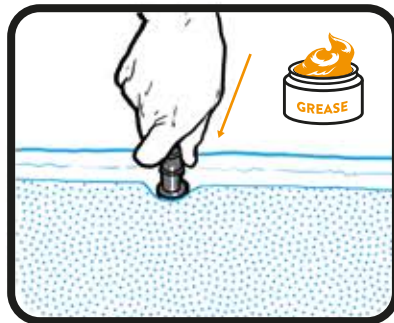

x2

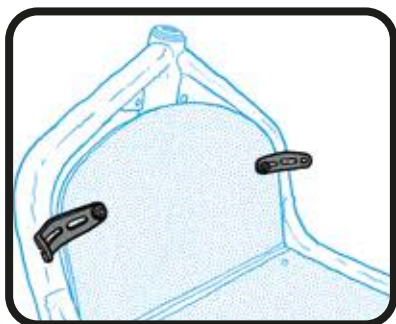

x4

- 1 Line up all the appropriate fittings on the Honeycomb board.

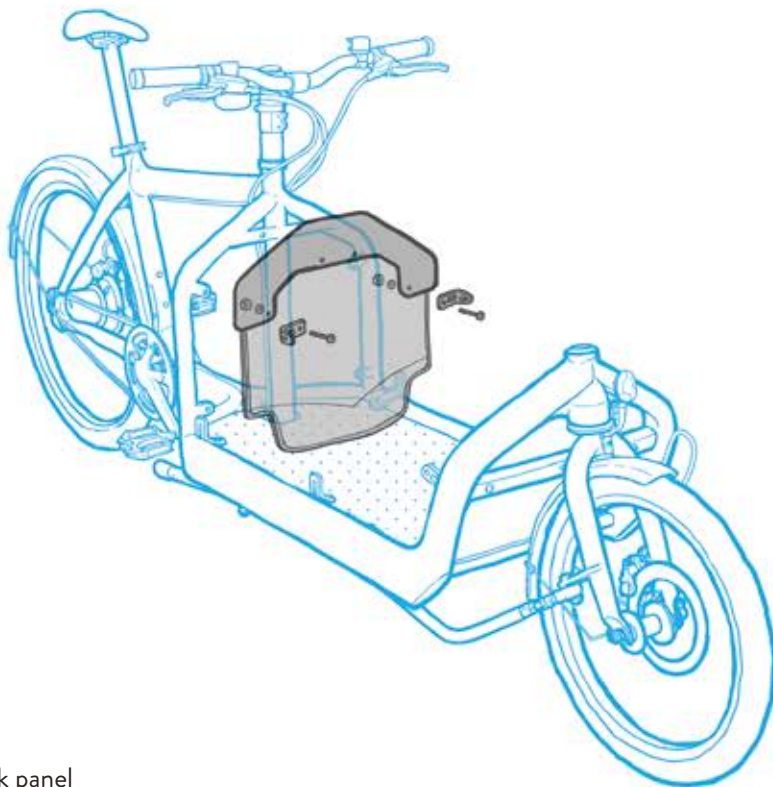

- 2 Insert the four brackets with rubber O-rings into the frame holes. Remember Grease, it helps to make them fit more easily!

- 3 Hand tighten the two front plate brackets.
Be aware: Do not tighten until sidepanels are attached!

Step 2

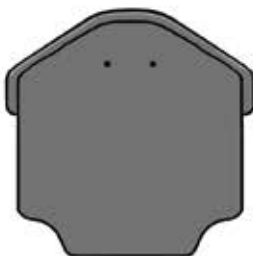

Attaching the back panel

Back panel

Front

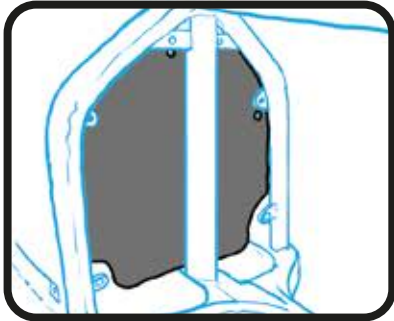

Back

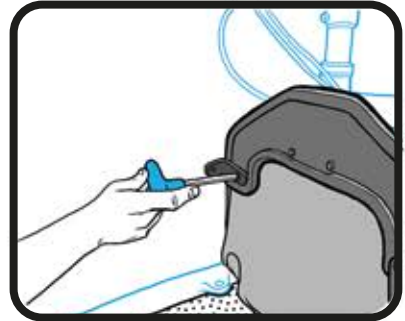

Add a bit of grease
(metal on metal)

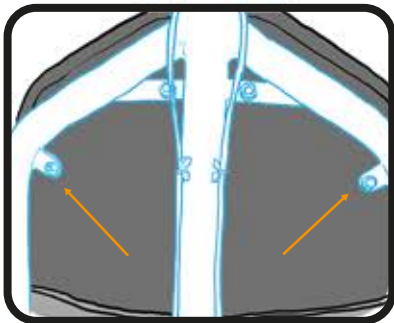

x2

- 1 Attach the fabric backpiece onto the frame...

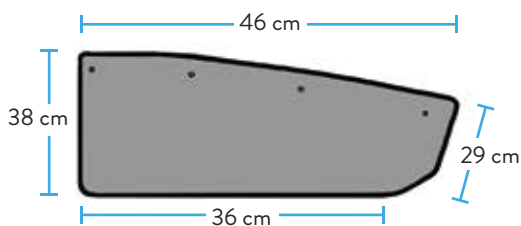

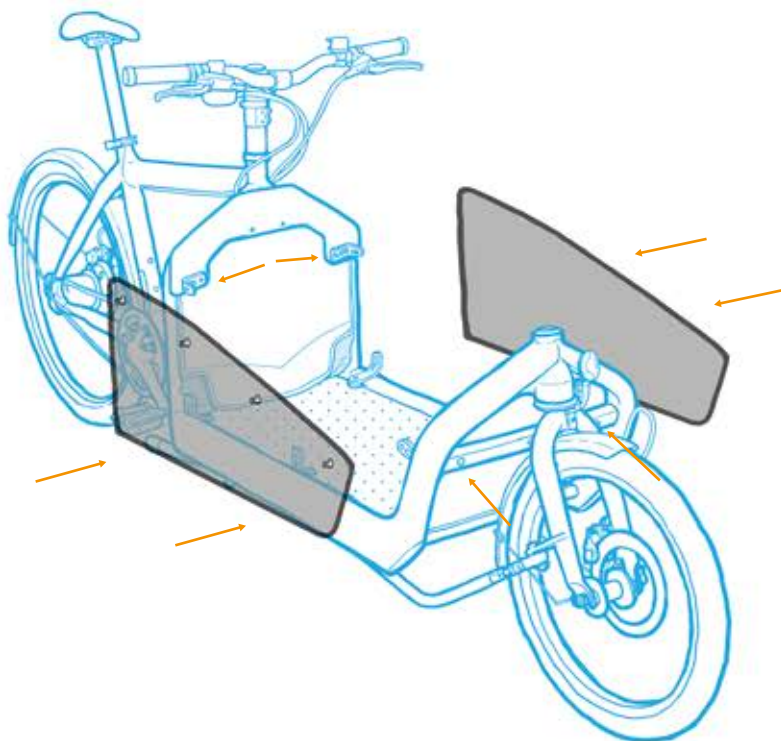

- 2 and then attach the Honeycomb backpiece and rear brackets on top of the fabric backpiece...

- 3 ...using the four attachment points. Be aware: Only hand tighten the thread locked nuts!

Step 3

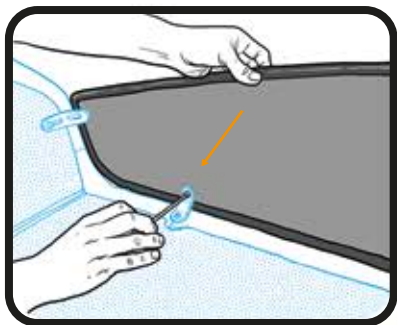

Attaching the sidepanels

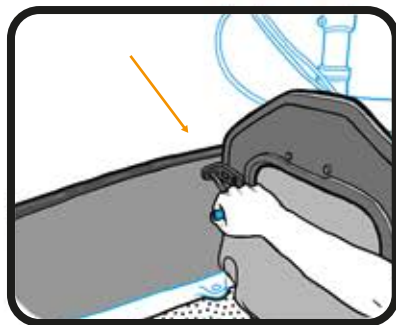

Sidepanels x2

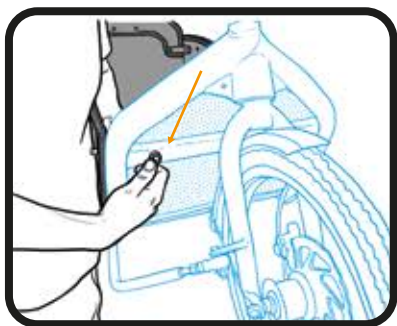

x8

- 1 Attach both side panels using the grub screws and ensuring they are aligned to the frame.

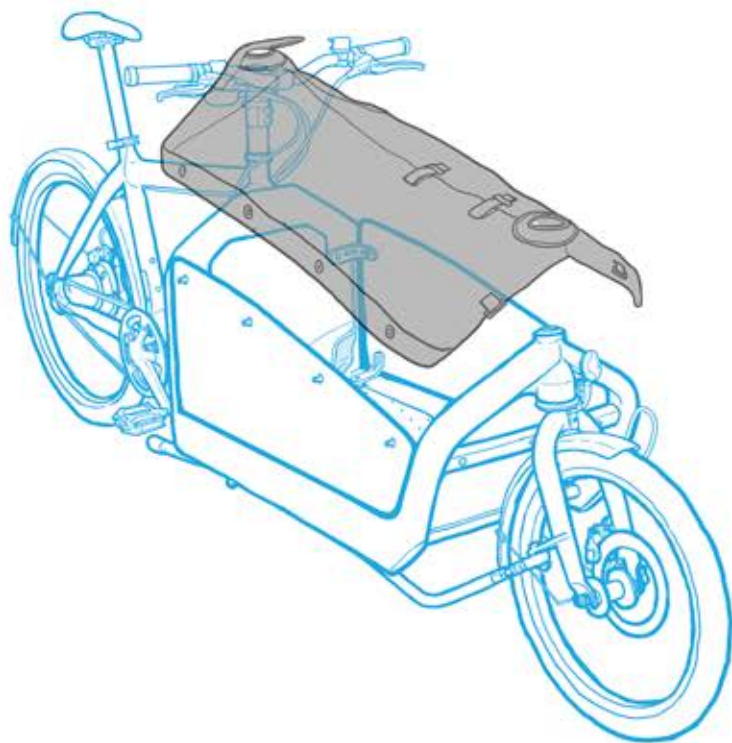

- 2 Now tighten the back brackets...

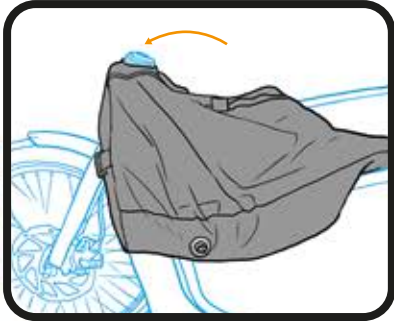

- 3 ...and then the front plate brackets.

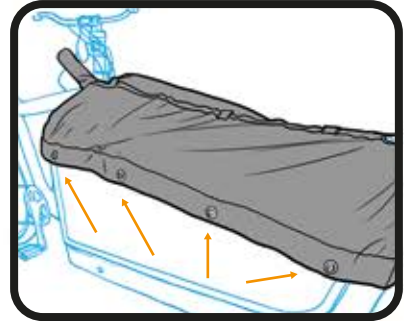

Step 4

Putting on the Top Cover

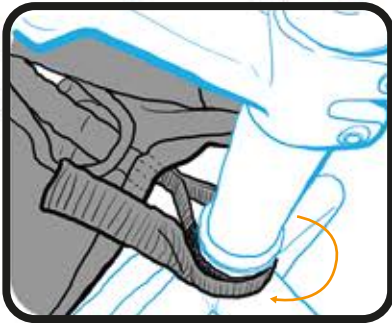

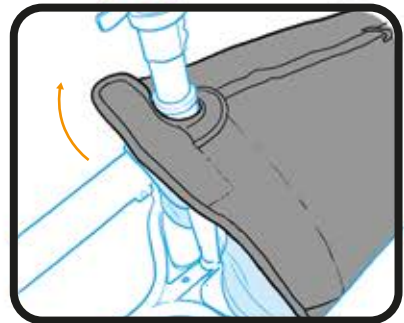

- 1** Place the front of the fabric cover over the headtube...

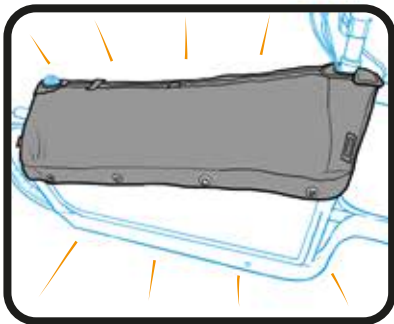

- 2** ...tension fabric using the attachment points on the side panels.

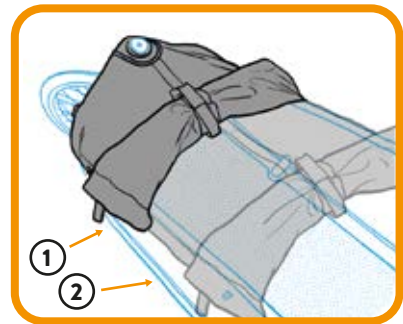

- 3** Tighten the first velcro strap under the headset cup on the steerer tube to ensure the covers fabric is tensioned correctly.

- 4** Pull the velcro ends together behind the steerer tube.

- 5** Et voilà!

In Use. Variable coverage options for passengers.

So... are you looking for a place to make your own artwork or putting your own logo all over your Bullitt?

We partnered with a company called Vorova, who are making high quality stickers for all Bullitt accessories.

They already have all templates for BBX etc, so give it a look, if you want to snazz up your Bullitt:
